Architecture

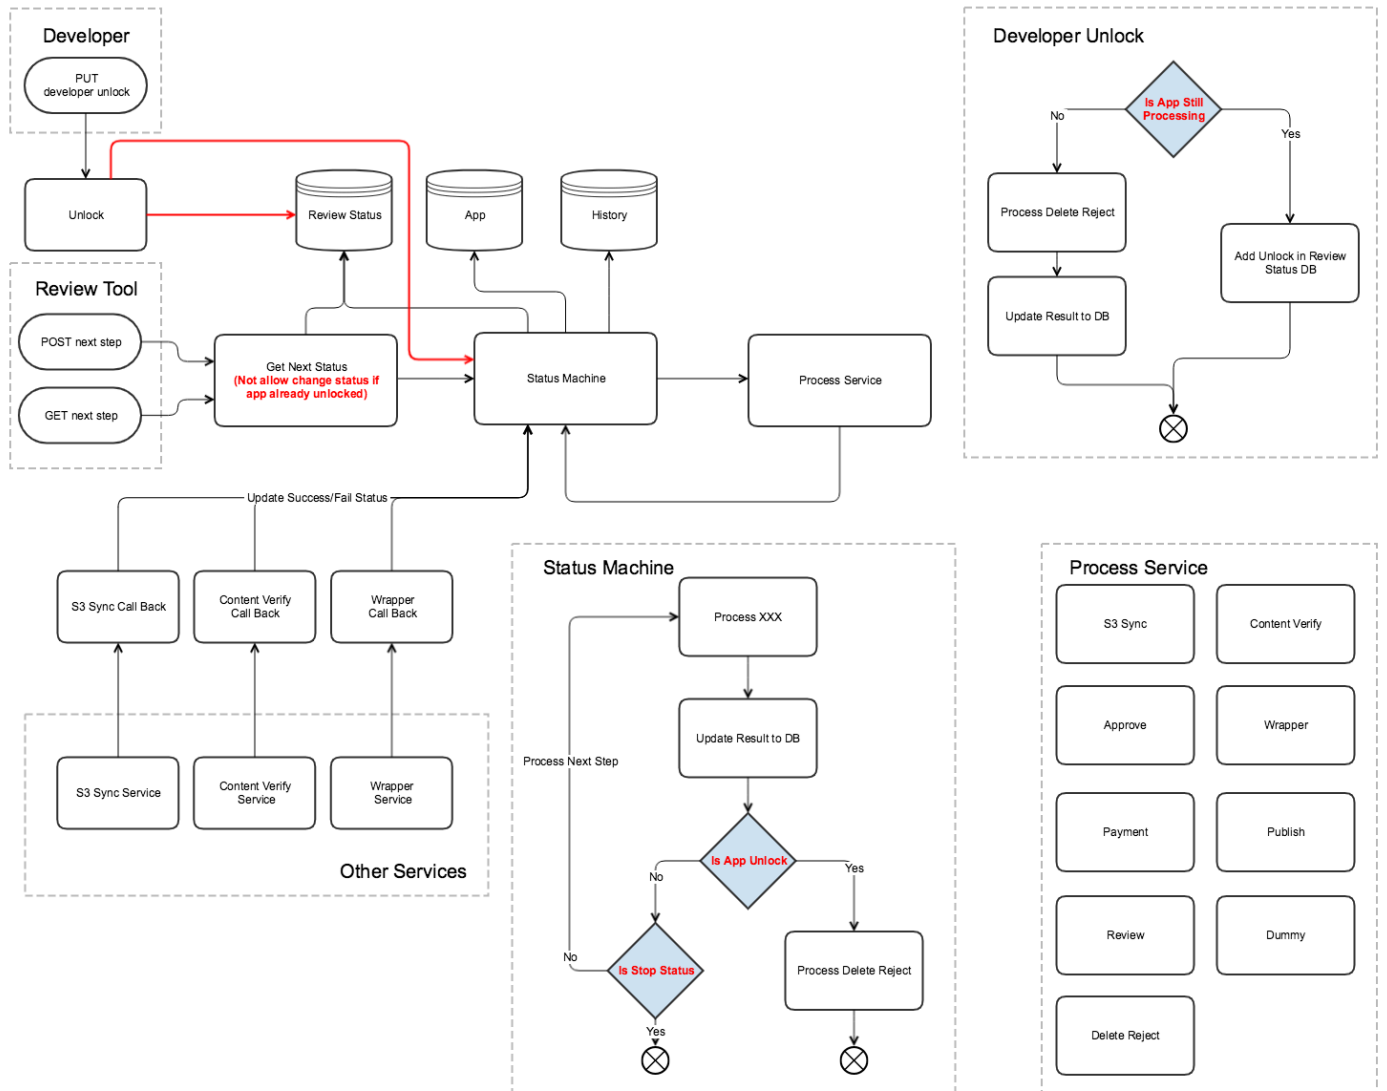

CMS Flow

App Flow

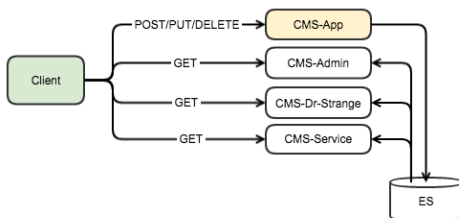

## Review Flow

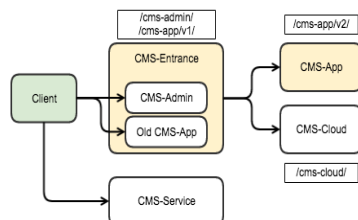

## Phase I

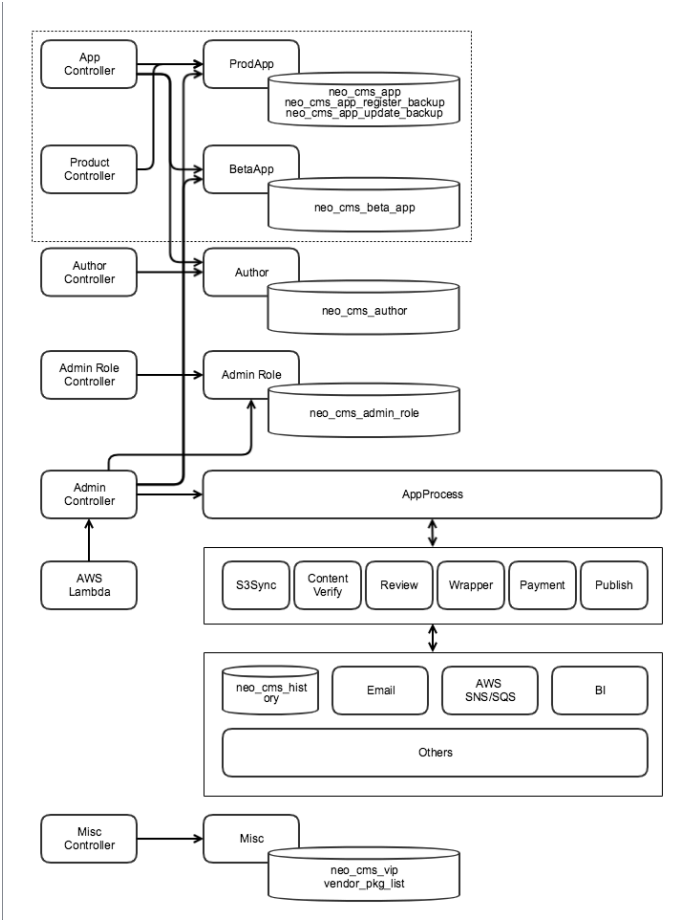

2020/10/19

2019/4/1 (Deprecated)

1. Same API, feature, DB schema(merge beta index), only separate into two services.
2. Use AWS Lambda to call auto-publish API.

CMS-Entrance

API gateway for backward compatible, redirect to CMS-App or CMS-Cloud.

| API redirect to CMS-Cloud                            | CMS-Cloud API                               | Note                   |
|------------------------------------------------------|---------------------------------------------|------------------------|
| GET /priv/cms-admin/v2/app/media/location/{id}       | POST /priv/cms-cloud/v2/location/list       | retired                |
| GET /priv/cms-admin/v2/app/media/stscredentials/{id} | POST /priv/cms-cloud/v2/stscredentials/list | retired                |
| GET /api/cms-admin/v3/s3/media/location              | POST /api/cms-cloud/v2/location/list        | FE tool                |
| POST /priv/cms-admin/v2/app/media/presignedurls/{id} | POST /priv/cms-cloud/v2/location/list       | retired                |
| POST /priv/cms-admin/v2/s3/media/location/list       | POST /priv/cms-cloud/v2/location/list       | stats-megatron-service |
| POST /priv/cms-admin/v2/s3/media/presignedurl/list   | POST /priv/cms-cloud/v1/presignedurl/list   | stats-megatron-service |

| API source                                                                                                                                     | API destination |
|------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| POST /priv/cms-admin/v2/app/register<br>POST /api/cms-app/v1/submit                                                                            |                 |

| PUT /priv/cms-admin/v2/admin/app/wstatus/{app_id}<br>PUT /priv/cms-app/v1/wsresult/{app_id}                                                    |                 |
| PUT /priv/cms-admin/v2/admin/app/{app_id}/status<br>PUT /priv/cms-app/v1/cvresult/{app_id}                                                     |                 |
| PUT /priv/cms-admin/v2/app/s3sync/report<br>PUT /priv/cms-admin/v2/app/s3sync/report/author<br>PUT /priv/cms-app/v1/app/s3sync/report/{app_id} |                 |

CMS-App

App collector, including prod and beta.

Flow controller.

Need DB, store app data, review history.

> app.info\_desc

```
app base

case class AppBase(
  /** App uuid. Ex: "93c137cd-2b1b-4f11-b2c2-5586d3ee1bb2". **/

### > Processing\_Publish

Step:

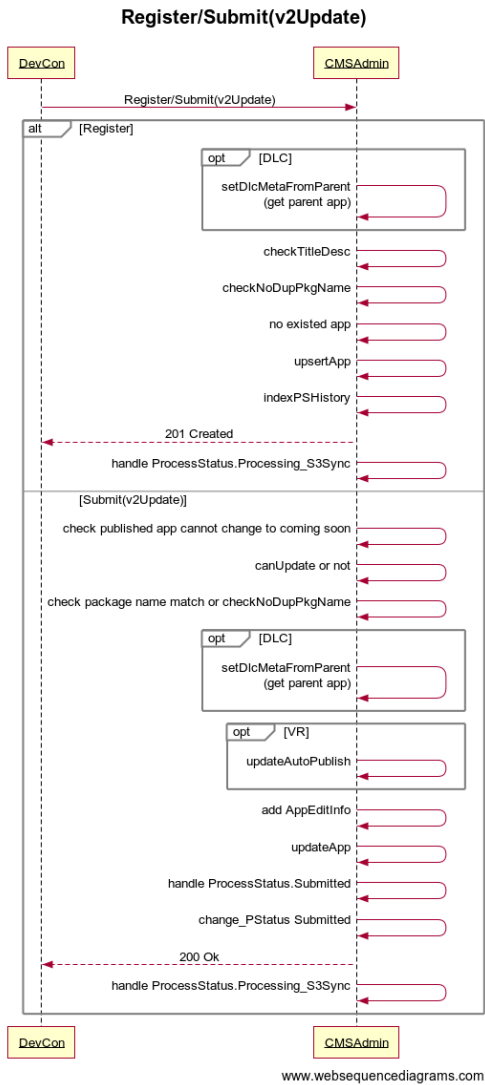

1. Check cms product id existed
2. OfferPlan check (if price changed)
3. Handle DLC, (DLC publish) setDicMetaFromParent, (MainContent publish) update children country
4. Copy media file (backup)
5. Update file publish flag
6. (not enterprise) Unpublish beta app with lower version
7. (not enterprise) (Arcade) Set app price review
8. (not enterprise) (Search) Push search event, pushEvent
9. (not enterprise) (Search) if product meta existed, pushPmEvent
10. (not enterprise) (AD) Notify AD with app info
11. (not enterprise) send salesforce
12. enable and upsert cms product
13. Update first\_release\_time, binary\_latest\_publish\_time, binary\_update\_time
14. send app difference email
15. upsert app to epoch\_status = 1
16. (arcadeOnly || enterpriseEnabled) sendSNSHandler

After sync product meta id

1. update product meta id into app (draft & publish)
2. pushPmEvent
3. sendSNSHandler

### > Unlock

Source

- Note
- 1. Retire GET /priv/cms-admin/v2/app/unlocked/{id}.
  - 2. Retire GET /priv/cms-admin/v2/author/{id}/icon.
  - 3. Retire GET /priv/cms-admin/v2/app/media/location/{id}.
  - 4. Retire GET /priv/cms-admin/v2/app/media/stscredentials/{id}.
  - 5. Retire POST /priv/cms-admin/v2/app/media/presignedurls/{id}.
  - 6. Retire POST /priv/cms-app/v1/unpublish.
  - 7. Hide POST /api/cms-app/v1/publishbeta.
  - 8. Todo: check author?
